Software Developer Excited about secured, AI driven, back-end development

EDUCATION:

Oct' 2022 – Aug' 2025 | "Holon Institute of Technology":

- **B.Sc. Graduate in Computer Science**

EXPERIENCE:

Sept' 2024 – Oct' 2025 | Data Integrity Specialist | Casualties Reserve Division

- 1+ year Experience with **data validation**, advanced Excel, **SAP-ERP** reports, **SQL**.
- Resolving missing, duplicated, or mismatched records across multiple data sources.
- Validating personal and operational data to ensure accuracy.
- Managed large scale records with accurate tracking and classification.

SKILLS:

- **Programming Languages:** Java, C#, Python, JavaScript, SQL.
- **Development**
 - Java / Spring Boot: REST API development, controllers & routing, DTO, validation, exception handling, authentication & authorization (JWT/Security).
 - DevOps / Cloud: Docker, Docker Compose, CI/CD with GitHub Actions, container registries (GHCR), AWS S3 integration, Linux environments.
 - Python: Pandas, NumPy, Scikit-Learn, TensorFlow, PyTorch, Matplotlib. Data preprocessing, model training, evaluation, automation.
 - SQL: MySQL, PostgreSQL, Data querying, cleaning, transformation, joins, aggregations.

PROJECTS:

PhishShield – Real-time phishing detection service | [GitHub](#) | [Live Demo](#)

- **Spring Boot** & **Google Gemini AI** to analyze SMS, emails, and URLs for scam attempts.
- Implemented **PII sanitization** to protect user privacy before AI processing.
- REST API with **OpenAPI/Swagger** documentation & **rate limiting** for abuse prevention.
- Containerized the application with **Docker** and deployed to cloud hosting.
- Automated CI/CD pipeline with **GitHub Actions** including build & test.
- Security scanning (**CodeQL**, **OWASP**), and Docker image publishing.
- Configured **Dependabot** for automated dependency updates and security patches.

Smart Job Tracker | [GitHub](#)

- Node.js, Express.js backend with JWT-based & **PostgreSQL** database.
- Containerized the application with **Docker** and deployed to **AWS EC2** hosting.
- Automated CI/CD pipeline with **GitHub Actions** including build & test.
- Kubernetes Orchestration with **HPA**, **PDB**, and **self-healing pods** for high availability.
- UI with React, Vite, TailwindCSS, and Zustand.
